

## How does SBM e-secure work?

SBM e-secure provides you with an additional layer of protection for your online purchases with registered merchants by sending you a One-Time Authentication Code.

### Step 1

Perform purchases at Visa Secure/MasterCard<sup>®</sup> SecureCode<sup>™</sup> registered merchant(s)

### Step 2

Checkout Page Registration process:

- Proceed to checkout to effect payment
- Enter your SBM Card number, Expiry Date and the 3 digits located at the back of the card on the checkout page

### Step 3

SBM e-secure Authentication Process

- A SBM e-secure pop-up window will appear, requesting you to select the preferred authentication mode to be used for sending the One-Time Authentication Code
- You will receive a One-Time Authentication Code on your registered mobile number or email address based on your preferred mode selected previously
- Enter your e-secure One-Time Authentication Code and proceed to complete your payment

**Your payment has been  
authenticated and secured.  
It's that simple!**
