

CAREER OPPORTUNITIES

SBM is a leading financial services group in Mauritius, with a growing presence in the region, namely in Kenya, India and Madagascar. We serve a client base of more than 875,000 across the corporate, retail and high net worth segments and we provide adapted financial solutions supported by multi-channel capabilities within a universal banking model. The strategy of the Group revolves around modernisation and diversification of its offering, expansion of its markets, enhancement of capabilities prominently with respect to human capital, and effective risk management.

Our employees – currently more than 2,500 across the Group – are at the heart of our growth strategy. In our quest to be the employer of choice, we are laying increasing emphasis on developing and nurturing talent. SBM aims to become a reference in creating talent for a smarter tomorrow.

Open your door to success by joining us in the following challenging position:

Mobile/Web Developer

Job Purpose:

Reporting to the IT Channels Lead, the Mobile/Web Developer will be responsible for the design, development and maintenance of Websites and Mobile Apps. The Developer will own the entire web and mobile applications lifecycle from concept stage until delivery and post launch support.

Key Responsibilities:

- Delivering across the entire website and app life cycle (concept, design, build, deploy, test, release and support)
- Working directly with product managers to conceptualise, build, test and realise products
- Gathering requirements around functionality and translate those requirements into elegant functional solutions
- Building prototypes at tech scoping stage of projects
- Working along other developers to create and maintain a robust framework to support websites and apps, with focus on usability features
- Creating compelling device specific user interfaces and experiences
- Standardising the platform as well as apps to deliver across multiple brands with minimal duplication of effort
- Optimising performance of websites and apps
- Keeping up to date on the latest industry trends in the mobile technologies
- Explaining technologies and solutions to technical and non-technical stakeholders

Qualifications, Experience & Skills:

- A University degree in Engineering (preferably in Computers/Electronics) and/or a University degree in Information Technology or Computer Science
- At least 1 year of relevant experience, in the BFSI domain, in managing & solutioning Mobile Applications and Websites
- Proven commercial software development experience – desktop and mobile
- Experience and understanding of the underlying technology platforms and PHP
- Experience in building web service integration (SOAP, REST, JSON, XML) and native apps
- Experience of HTML5, JavaScript, jQuery, Ajax and PHP using social media APIs, GCM, and APNS
- Experience in Agile and DevOps
- Familiar with iOS and Android SDK and Strong design and programming skills in Objective-C, Java (J2EE/ J2ME)
- Knowledge of SQLite, MySQL or similar database management system
- Understanding of other compiled languages and Ads integration using a 3rd party ad server
- Using SVN as Source control System
- Excellent knowledge in information architecture, human computer interaction and usability design principles
- Ability to use analytic data and user testing to inform design decision
- Ability to multi task and good time management skills as well as ability to work independently or as a team member
- Essential in scoping, estimation skills and testing/QA skills
- Excellent debugging and optimisation skills as well as creative design skills
- Strong communication and interpersonal skills
- Knowledge of relevant and recent technology areas in the BFSI domain
- Awareness of relevant regulatory frameworks as applicable to the BFSI sector
