**Market comments**

The Net Asset Value per unit (NAV) of the Fund fell from MUR 18.22 in July to MUR 18.16 in August, equivalent to a return of -0.3% while the benchmark return posted 0.6%. Local indices registered positive returns for the month of August with the SEMDEX and DEMEX closing at 2,447.79 and 223.07 points, equivalent to respective returns of 0.8% and 0.7%. The main leaders, that is, companies which contributed to the positive performances of the SEMDEX were SBMH, MCBG and ENLG while the main laggards were SUN, CIEL and ERL. The top three price performers were ENLG (+34.0%), BMH (+16.6%) and BLL (+15.2%), while the main detractors were HWF (-15.7%), MCFI (-9.8%) and FINCORP (-6.7%). As at 31 August, the price-earnings ratio of the SEMDEX stood at 6.76x, up from 6.71x in July, while the dividend yield remained unchanged at 4.69%. Foreign flows turned positive to the tune of MUR 179.6M (vs. net outflow of MUR 122.7M in Jul-25), skewed by the significant flows in Afrexim DR (USD). Excluding this transaction, the net foreign flows were negative to the amount of MUR 121.0M driven mainly by MCBG, CIEL and TERA.

Global equity markets extended their winning streak in August, buoyed by renewed optimism around monetary policy. Investor sentiment improved notably following Federal Reserve Chair Jerome Powell's Jackson Hole speech, where he hinted at a possible rate cut in September as inflation showed signs of stabilising. The prospect of easier policy, coupled with resilient corporate earnings and moderating inflation data across major economies, helped drive risk appetite higher; the MSCI World index gained 2.5% MoM.

In the United States, the S&P 500 climbed to fresh all-time highs in August, advancing 1.9% MoM supported by improving macroeconomic sentiment, strong sectoral momentum and notable stock performances. Investor confidence was further bolstered by Fed Chair Jackson Hole remarks, which signalled the prospect of an upcoming rate cut and sparked a broad-based rally, with rate-sensitive segments such as technology and small-cap equities leading the charge. 9 out of the 11 major industry groups recorded positive returns, led by Materials, Health Care and Communication Services. Value stocks outperformed their growth counterparts, registering 3.2% vs 0.8% MoM. Headline CPI remained unchanged at 2.7% in July 2025 as easing energy costs and contained food prices offset persistent pressures in shelter and medical services; this moderation in inflation bolstered hopes that the Fed could begin cutting rates as early as September. The S&P Global US Manufacturing PMI rose sharply to 53.0 in August, up from July's contractionary 49.8, its strongest expansion since May 2022, reflecting a surge in new orders, rising production, expanded hiring, and inventory rebuilding. Input cost inflation picked up notably in August, marking the second-strongest increase seen over the past three years.

European equities posted a return of 0.6% MoM. Major European markets exhibited unusually weak correlations over the past 30 days, indicating that thematic and country-specific drivers are exerting a greater influence than the broader global tide. FTSE MIB index was the star performer in Europe, gaining 2.9% in August while the CAC 40 and DAX indices edged down 0.9% and 0.7%, respectively. In August, the Eurozone manufacturing returned to growth with its headline index rising to 50.7 (July 2025: 49.8), the first above-50 reading since June 2022. The expansion in operating conditions was driven by strong domestic demand and a revival in new orders, especially in Spain and Greece. In the UK, the FTSE 100 advanced by 0.6%. Manufacturing activity remained under pressure, as production volumes contracted for the tenth consecutive month; PMI dropped to 47.0 in August, down from 48.0 in July, reflecting sustained contraction, as new orders slumped, input costs rose, and job cuts persisted.

Japanese equities maintained their momentum with the Nikkei 225 rallying by 4.0% MoM, powered by easing US-Japan trade tensions, a weaker yen that amplified exporter earnings, robust corporate results (especially from tech and auto sectors). The manufacturing sector remained in contraction, with the PMI at 49.7 in August (July 2025: 48.9), as export orders plunged at their sharpest rate in over a year, even amid modest output stabilisation and continued hiring, while rising input costs, squeezed margins, and fading business confidence underscored the sector's fragility.

Emerging markets underperformed developed markets' equities with the MSCI Emerging Markets index recording 1.2% MoM. The CSI 300 index surged 10.3% MoM in local currency and 11.4% in USD terms, fuelled by a policy-driven support and stimulus expectations, easing US-China trade tensions, a rise in institutional flows as well as growing retail participation. China Manufacturing PMI rose to a 5-month high of 50.5 in August, up from 49.5 in July, signalling an improvement in operating conditions and a return to expansion, driven by surging new orders and rising backlogs. Indian equities remained on a downward trajectory during the month, pulled down by sharp US tariff hikes, foreign outflows and weaker earnings across key sectors; the BSE Sensex shed 1.7%. Manufacturing PMI surged to 59.3 in August, up from 59.1 in July, signalling the strongest factory-sector growth in nearly two decades, propelled by robust domestic demand, rising production, persistent hiring, higher pricing power, and renewed business optimism, even as export growth moderated amid external tariff pressures.
