Market comments

The Net Asset Value per unit (NAV) of the Fund increased from MUR 18.53 in September to MUR 18.89 in October, equivalent to a return of 2.0% against its benchmark return of 1.7%. Local indices registered diverging performances in October with the SEMDEX ending in marginally positive territory with a return of +0.3% to close at 2,469.01 points while the DEMEX headed south to 220.94 points, equivalent to a return of -1.4%. The main leaders, that is, companies which contributed to the positive performances of the SEMDEX were ASCE, IBLL and SHELL while the main laggards were ERL, MSE and PAD. The top three price performers were ASCE (+11.1%), ENLG (+7.0%) and IBLL (+4.8%), while the detractors were UBP (-10.4%), MSE (-7.1%) and ERL (-6.8%). The price-earnings ratio and dividend yield of the SEMDEX stood at 7.52x and 4.60%, respectively as at 31 October against corresponding figures of 7.44x and 4.61%, as at 30 September. During the month, foreign investors remained net seller, though to a lower tune of MUR 165.1M (vs. MUR 223.8M in Sep-25), led mainly by MCBG, ERL and SBMH.

Global equity markets extended their gains in October, supported by moderating inflation data and growing expectations that major central banks, particularly the Federal Reserve (Fed), were moving closer to additional rate cuts. Investor sentiment was further supported by resilient corporate earnings and a modest improvement in US-China trade relations; the MSCI World index added 1.9% MoM.

In the United States, the S&P 500 gained 2.3% in October driven by broadly solid corporate earnings, the Fed's widely expected 25bps rate cut and easing tensions between the US and China. Growth stocks outperformed their value counterparts, registering 3.3% vs 1.0% MoM. 6 out of 11 major industry groups recorded positive returns, led by Information Technology, Health Care and Consumer Discretionary. The S&P Global US Manufacturing PMI recorded 52.5 in October, up from 52.0 in September, indicating an improvement in operating conditions, underpinned by the fastest growth in demand recorded in nearly 2 years. Employment growth softened to a 3-month low, and input inventories rose only modestly, suggesting manufacturers remain cautious amid a still-fragile global demand.

The Eurostoxx 50 index advanced by 2.4% in October, supported by easing inflation, stable monetary policy, and improving sentiment across cyclical sectors. The CAC 40 and FTSE MIB indices recorded respective performances 2.9% and 1.1%, while the DAX 30 index registered 0.3%. Manufacturing activity in the Euro area expanded in October, signalling a return to expansion for the first time since mid-2022: the PMI headline index rose marginally to 50.0 (September 2025: 49.8). The improvement was driven by a modest pickup in new orders and output, particularly in Germany and France, where demand conditions showed tentative signs of stabilisation. Input cost inflation remained contained, while business confidence improved on expectations of lower interest rates and easing supply-side pressures. In the UK, the FTSE 100 gained 3.9%, boosted by strong corporate earnings and expectations of further easing by the Bank of England. The S&P Global UK Manufacturing PMI rose to 49.7 in October from 46.2 in September, marking a 12-month high and indicating a much slower pace of contraction. The improvement was driven by stabilising demand and a softer decline in output and new orders, while easing input cost pressures supported business sentiment.

Japanese equities were the best performer amongst developed peers with the Nikkei 225 rallying by 16.6% MoM, driven by a weaker yen boosting export earnings, strong results from major technology and industrial firms, and renewed foreign investor inflows. Operating conditions worsened in October with the PMI edging down to 48.2 in October from 48.5 in September, indicating further contraction in output; Weak demand, especially across the automotive and semiconductor segments, placed further pressure on the sector, leading to a sharp decline in new orders, the steepest contraction since early 2024.

Emerging markets outperformed developed markets' equities with the MSCI Emerging Markets index recording 4.1% MoM. The CSI 300 index remained broadly flat during the month, both in local currency and in USD terms, as supportive policy measures and targeted stimulus were offset by ongoing concerns over the property sector and subdued corporate earnings momentum. China Manufacturing PMI eased to 50.6 in October 2025 (September 2025: 51.2), reflecting softer growth in new orders and production, alongside lingering weakness in external demand. Indian equities extended their upward momentum in October with the BSE Sensex advancing 4.6%, supported by robust domestic flows, sustained strength in corporate earnings, and continued resilience in domestic demand. Manufacturing PMI rose to 59.2 in October from an earlier reading of 57.7, signalling a faster and robust improvement in manufacturing conditions; the upturn was driven by strong increases in output and new orders, supported by resilient domestic demand and improved business confidence.
